

User Manual

The user first needs to sign in with his or hers google account. If succesful, the person is taken to the profile page, which displays the users own profile.

On the first page you can swipe down to refresh the information that is displayed. As an example; if you just travelled with bus 55 and want to display the new information, you can just swipe down to refresh your profile page. At the bottom of the profile page there is an achievement tab. The achievement tab is scrollable horizontally, and the achievements are all clickable.

When you click on an achievement you are directed to a detailed achievement view which displays information about that specific achievement. Your personal progress on that achievement is displayed as well. If you click anywhere on the screen on this page you get back to the profile page.

If you swipe left on the main page you are directed to a toplist. If you swipe down, you will also update the toplist. You can click on every person in the toplist to see more information about each individual. The detailed profile page is also clickable, and when clicked you will be taken back to the toplist.

On the top right of the screen there is a search button which enables a search in the toplist.

To log a trip when you travel with bus 55 you don't have to do anything. You can have the app completely shut off, and the trip will still be registered.
